### Summary Rating Rationale

The subject transaction is a cash securitisation of a EUR 3,325 million static pool comprising loans and drawdowns under mortgage lines of credit originated by CaixaBank, S.A. ("CaixaBank", Long Term Deposit Rating: Baa1 Not on Watch /Short Term Deposit Rating: P-2 Not on Watch) and extended to small and medium-sized enterprises (SME) and self-employed individuals located in Spain. The portfolio consists of standard loans as well as drawdowns under lines of credit, some being secured by real estate and some unsecured. Our quantitative, structural and legal analysis of this transaction supports the ratings assigned to the notes.

### Credit Strengths

#### » Portfolio characteristics:

- *Granular portfolio*: The effective number of obligors is more than 2,000 and the top obligor group represents 0.65% of the pool balance.
- *Absence of refinanced and restructured assets*: refinanced and restructured loans/credit lines (as defined by the Bank of Spain) have been excluded from the pool (See the Appendix 3).

**» Transaction structure:**

- *Simple structure:* The transaction structure includes a single waterfall and a relatively simple reserve fund mechanism, among other features (see section Detailed Description of the Structure).

**» Other features:**

- *Good performance of the Originator previous transactions:* performance of CaixaBank originated transactions has been better than the average observed in the Spanish market (see section Primary Asset Analysis).

## Credit Challenges

**» Portfolio characteristics:**

- *Exposure to the real estate sector:* 23.2% of the pool balance is exposed to the Construction and Building sector (according to our industry classification), which includes 12.2% corresponding to loans granted to real estate developers. This feature has been taken into account in our quantitative analysis (see section Primary Asset Analysis).
- *Holiday Payments:* some contracts can allow future principal (4.1% of pool balance) or interest and principal (1.5% of pool balance) holiday payments. (see section Primary Asset Analysis).
- *Region Concentrations:* 30.4% of the pool is concentrated in Catalonia (see section Primary Asset Analysis).

**» Transaction structure:**

- *High degree of linkage to the originator:* Besides acting as servicer, the Originator holds the accounts receiving the pool collections and the account holding the reserve fund (commingling risk). This feature has been taken into account in our analysis (see section Additional Structural Analysis).
- *Interest rate risk:* 65.6% of the pool balance consist of floating rate loans and 34.4% consist of fixed rate loans, whereas the notes are floating liabilities. Therefore, the transaction is exposed to interest rate and basis risk as the transaction is not protected by an interest rate swap. This feature has been taken into account in our analysis (see section Additional Structural Analysis).

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on [www.moody's.com](http://www.moody's.com) for the most updated credit rating action information and rating history.

Source: Moody's Investors Service

## Asset Description

The securitised portfolio consists of loan contracts and drawn amounts under lines of credit entered into by the Originator with SMEs and self-employed individuals in Spain, most of them granted to fund the acquisition of fixed assets (23.3% of the pool balance) and machinery and vehicles (15.12% of the pool balance).

The balance of the audited provisional portfolio is approximately EUR 3,466 million, 24.4% of which is secured by real estate mortgages (16.8% is secured by first lien mortgages), with a weighted average loan to value of 48.3%. The vast majority of the portfolio are assets with a monthly payment frequency (82.38% of the pool balance). In terms of borrower type, 77.8% of the pool balance consists of loans and drawn amounts under lines of credit granted to SMEs and 22.2% consists of assets granted to self-employed individuals. The assets were originated mainly between 2014 and 2018 (83.35% of the pool balance), and have a weighted average seasoning of 2.6 years and a weighted average remaining term of 6.7 years. The longest asset matures in 2048. Geographically, the pool is concentrated in Catalonia (28.2% of the pool balance). Most assets are subject to French or lineal amortisation (96.56% of the pool balance) and 3.29% are subject to bullet amortisation.

Around 4.1% of the portfolio can allow future principal payment holidays, and around 1.5% of the portfolio can allow future payment holidays on interest and principal.

**POOL CHARACTERISTICS**

The below table and exhibits show some basic characteristics of the pool of assets.

**LINES OF CREDIT**

6.3% of the portfolio comprises drawdown amounts under a product structured as a line of credit, some of them secured by mortgages and some of them unsecured. This product gives the borrower the opportunity to obtain additional financing easily as well as payback flexibility.

Borrowers are allowed to withdraw for an amount equal to the already amortised amount, or up to an established credit limit. The credit lines are typically used for the purpose of acquiring assets and working capital.

The main characteristics of the line of credits are the following:

- » The subsequent redraws rank pari-passu with the first draw in case of foreclosure
- » CaixaBank may impose clauses that allow the bank to deny subsequent redraws when they are not feasible (based on the borrower's payment history, etc.)
- » The lines of credit might have the option of enjoying principal grace periods and holiday payments

**ORIGINATOR AND SERVICER**

CaixaBank is the transaction's originator and servicer. The table below provides details about CaixaBank (for more information on the Originator and Servicer please see Appendix 2).

The exhibits below show the historical performance data of CaixaBank originations.

- » Moody's received static default (more than 90 days in arrears) and recovery data on a pool similar to the pool securitised in this transaction, broken down by subpools depending on the type of collateral of the loans (mortgage subpool and non-mortgage subpool).
- » The information provided covers the period from Q1 2011 to Q4 2017.

ELIGIBILITY CRITERIA

While the transaction does not establish an eligibility criteria per se, the Originator's Representations and Warranties regarding the assets define which asset the SPV can purchase. See the Appendix 3 for a list of the transaction's key eligibility criteria.

ABSENCE OF REVOLVING PERIOD

The securitization does not include a revolving period during which the SPV could purchase additional loans. This limits the portfolio performance volatility caused by additional loan purchases.

## Assets Analysis

### Primary Asset Analysis

We based our analysis of the transaction assets on factors including historical performance data, originator and servicer quality and pool characteristics.

#### PROBABILITY OF DEFAULT

We use the originator's historical performance data to help determine the mean probability of default of the securitised pool.

*Derivation of default rate assumption:* We analysed the available historical performance data the Originator provided and the performance of previous transactions originated by CaixaBank. We extrapolated the default vintage data to define the cumulative default curve for each of the origination vintages.

We complemented the historical data analysis with a top-down approach, as we typically apply when rating SME loan transactions, and as described in more detail in our methodology report, Moody's Global Approach to Rating SME Balance Sheet Securitizations, August 2017. Starting from a base rating proxy of Ba2 for a SME based in Spain (Baa1/(P)P-2), we evaluate the portfolio based on several features, including:

1. The size of the companies (we assume one notch penalty for micro-SMEs and self-employed individuals, representing approximately 51.1% of the pool balance).
2. The borrowers' sector of activity. For example, we applied a one-notch penalty to assets whose underlying borrower was active in the construction sector (11% of the pool balance, i.e. 23.2% plus 12.2% corresponding to real estate developers) and a two-notch penalty for borrowers classified as real estate developers (12.2% of the pool balance).
3. The holiday payments. We applied a penalty on the default probability of the assets for which it is allowed future principal (4.1% of the pool) or interest and principal (1.5% of the pool) payment holidays, considering the number of payment holiday periods allowed.

We adjusted our assumption to take into account the current economic environment and its potential impact on the portfolio's future performance (zero notch penalty), as well as industry outlooks or past observed cyclicality of sector-specific delinquency and default rates. We also evaluated and benchmarked the originator's underwriting capabilities against other Spanish originators (¼-notch benefit).

As a result, we expect an average portfolio credit quality equivalent to a probability of default corresponding to a Ba3 proxy rating for an average life of approximately 3.8 years for the portfolio. This translates into a gross cumulative default rate of 10%.

#### SEVERITY

We analyzed the historical recovery data as provided by the originator.

*Derivation of recovery rate assumption:* assumptions for recoveries were made on the basis of (i) historical recovery information provided specifically for this deal and data available from previous deals of the Originator; (ii) statistical information on the Spanish SME market; and (iii) collateral-specific loan-by-loan portfolio information. With regard to the credit lines, given that the subsequent redraws rank pari-passu with the securitised drawdowns in case of execution, we have stressed the recovery rate by assuming that the current undrawn amounts under the credit line contracts are fully redrawn by the borrowers (until the credit limit is reached).

Based on this analysis we assumed a stochastic mean recovery rate of 42% and a standard deviation of 20%. We assumed the base case recovery timing as follows: 50% in second year after default and 50% in third year.

#### DEFAULT DISTRIBUTION

Owing to the high granularity of the pool, we used a normal inverse default distribution. Two basic parameters needed to be assessed as main inputs to generate the default distribution:

- » The mean default probability for the portfolio (10% over an average life of approximately 3.8 years, as explained above), and
- » The standard deviation of the normal inverse distribution.

*Standard deviation:* To define the standard deviation for the normal inverse default distribution, we ran a Monte Carlo simulation (using the Moody's CDOROM™) based on the securitised portfolio's actual loan-by-loan information to capture the pool concentrations in terms of single obligors and industry segments. We used, inter alia, the loan-by-loan default probabilities (i.e. outcome of the analysis carried out in section Primary Asset Analysis), the borrower industry sectors, the weighted average life and a probabilistic correlation framework. Finally, we performed a benchmark analysis against other recent Spanish SME deals and took into account the Aa1 country's local currency country risk ceiling (LCC) to calibrate the curve.

As a result, we assume a normal inverse default distribution with a coefficient of variation (ratio between standard deviation and mean default rate) of 43.2%, resulting in a Portfolio Credit Enhancement (PCE) of 20%, that takes into account sovereign risk as well.

*Timing of default:* We assumed a flat default timing curve as base case, spread over the portfolio's WAL (rounded up to 4.0 years) starting after the default definition.

### PREPAYMENTS

Based on the performance of previous deals originated by CaixaBank and the benchmark analysis against recent similar transactions we assumed a CPR at a level of 5% per annum.

### DATA QUALITY

The quantity and quality of the originator's historical default data we received is in line with other transactions which have achieved investment grade ratings in this sector.

### Comparables

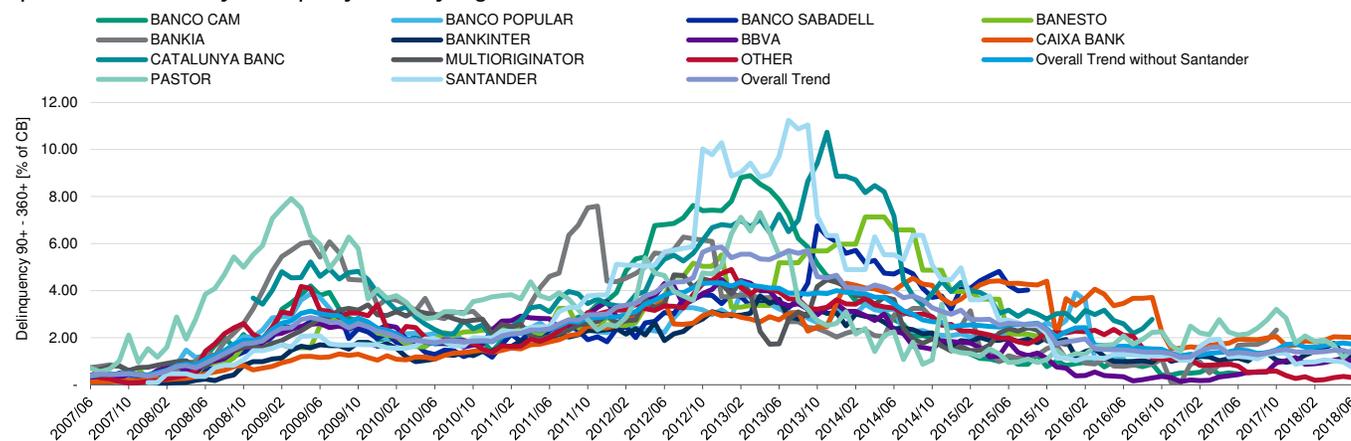

#### PRIOR TRANSACTIONS OF THE SPONSOR

The performance of the Originator's previous transaction has been better than that of the remaining Spanish originators in the SME segment (see details in exhibits below).

## Securitization Structure Description

The proceeds of the notes will be used to finance the acquisition of the portfolio, the original amount of which equals EUR 3,325 million (as of closing). The interest and principal priorities of payment are combined in a single waterfall. The amortization period will start on the first interest payment date.

### Structural Diagram

Exhibit 21

#### Structural Diagram

Source: Moody's Investors Service based on transaction documents

## Detailed Description of the Structure

### CREDIT ENHANCEMENT

The main sources of credit enhancement are the subordination (16.0% in the case of Class A notes, as a percentage of the initial pool of assets), the reserve fund and the excess spread.

*Reserve fund:* At closing the transaction will have a reserve fund equivalent to 4.75% of the principal outstanding amount of Series A and B notes, i.e. EUR 157,937,500. The reserve fund will be used on an ongoing basis to cover potential shortfalls on interest or principal on Series A notes, for as long as these are outstanding. Only after Series A notes have been fully redeemed, the reserve fund will be available to cover any interest or principal shortfalls on Series B notes.

### LIQUIDITY

The single waterfall means principal is also available to make interest payments. The reserve fund is a further source of liquidity; it covers more than three quarterly coupon payments on the Class A and B notes and senior fees, assuming a stressed 3 month EURIBOR of 4% and stressed fees.

**WATERFALL**

On each quarterly payment date, the issuer's available funds (i.e. interest and principal amounts received from the portfolio, the reserve fund, and interest earned on the issuer's account) will be applied in the simplified order of priority shown in Appendix 3.

**PDL MECHANISM**

A principal deficiency ledger (PDL) is defined as the negative difference between the principal available funds and a target principal amount. A target principal amount is the difference between the notes' outstanding principal and the performing assets. In this transaction, a non-performing asset is defined as (i) one in arrears for a period equal or exceeding 12 months for amounts due; (ii) one classified as non-performing by the Management Company because there is reasonable doubt that it will be repaid in full; or (iii) one in which the debtor has been declared insolvent.

**TRIGGERS**

Exhibit 22

**Originator, Servicer, Cash Manager and Counterparty Triggers**

| <b>Originator, Servicer, Cash Manager and Counterparty Triggers</b> |   |
|---|---|
| Key Servicer Termination Events:                                    | » Insolvency;<br>» Breach of service obligation resulting in being substituted as servicer; or<br>» At the request of the management company (acting in the best interest of the noteholders) |
| Appointment of Back-up Servicer Upon:                               | N/A   |
| Key Cash Manager Termination Events:                                | Insolvency  |
| Notification of Obligors of True Sale:                              | Following the termination of the appointment of the Servicer  |
| Conversion to Daily Sweep (if original sweep is not daily):         | Not applicable (daily sweeping since closing).  |
| Notification of Redirection of Payments to SPVs Account:            | Following the termination of the appointment of the Servicer  |
| Accumulation of Set Off Reserve:                                    | N/A   |
| Accumulation of Liquidity Reserve :                                 | N/A   |
| Set up Liquidity Facility:  | N/A   |
| Issuer Account Bank/Paying Agent Replacement:                       | If CaixaBank's long- term rating falls below Ba2 it will have to find a suitably rated guarantor or substitute  |

**CASH COMMINGLING RISK AND ACCOUNT BANK RISK**

Commingling risk generally arises when cash belonging to the SPV is deposited in an account held in the name of a third party, specifically the servicer. The Servicer collects all of the payments under the loans in its portfolio under a direct debit scheme into its account and transfers them daily to a treasury account in the name of the SPV.

As a result, in the event of insolvency of the Servicer, and until notification is delivered to the relevant debtors to redirect their payments, payments by the underlying debtors will continue to be collected by the Servicer and may be commingled with other funds belonging to the Servicer.

Issuer Account Bank trigger is set at the loss of Ba2 (deposit rating), the remedy being to replace the Issuer Account Bank or find a guarantor.

**CLAW-BACK RISK**

As per the Spanish legal framework, in the case of the transfer of credit rights claw-back risk is limited to those activities performed during a period of two years prior to the declaration of the bankruptcy state and only in the event of fraud.

**SET-OFF**

100% of obligors have accounts with the Originator. According to the Spanish Law, set-off is very limited because only unpaid instalments prior to the declaration of insolvency might be offset against the deposits held by the debtors (considered as fully due and payable prior to the insolvency).

**TRUE SALE**

According to the legal opinion received, the sale of credit rights has been carried out in compliance with Spanish securitisation law.

**BANKRUPTCY REMOTENESS**

*Bankruptcy remoteness:* Under Spanish securitisation law, a Spanish SPV (Fondo de Titulización) is not subject to the Spanish Insolvency Act. Only the Management Company, acting in the best interest of the noteholders, can decide to liquidate the SPV.

**RENEGOTIATIONS**

Although the servicer can renegotiate the terms of the loans, its ability to do so is limited. For example:

- » The weighted average interest rate of the assets after any renegotiation may not be below the 3-month EURIBOR (minimum of 0%) plus 1%.
- » The maturity date on a loan may be extended (limited to 5% of the initial portfolio), provided that (i) maturities on mortgage assets may not be extended beyond February 2048 and (ii) maturities on non-mortgage assets may not be extended beyond December 2030.

**MANAGEMENT COMPANY**

CaixaBank Titulización, S.G.F.T., S.A. is the transaction's Management Company, which, according to the Spanish Law and the transaction legal documentation, is responsible for the organisation, management and legal representation of the SPV and is also responsible for the representation and defence of the interests of the noteholders.

The Management Company main responsibilities are described in Appendix 4.

**Securitization Structure Analysis**

We modeled the bond structure and cash flow waterfall to assess the amount of credit enhancement supporting the rated securities. We also analyzed the allocation of payment, bankruptcy remoteness and other structural issues.

**Primary Structure Analysis****EXPECTED LOSS**

We determine expected losses for each tranche based on a number of assumptions, which are listed in the exhibit below.

Exhibit 24

**Expected Loss Assumptions**

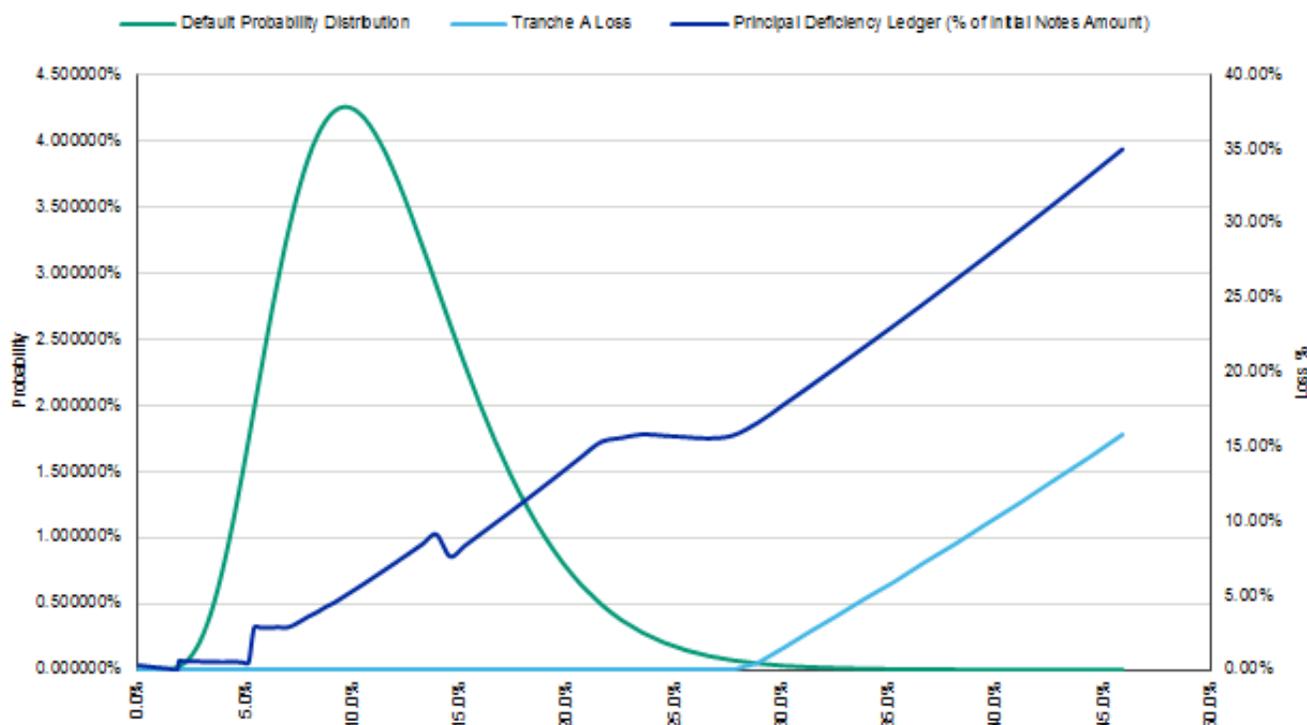

| <b>Expected Loss Assumptions</b>   |   |
|------------------------------------|---|
| Default Distribution               | Inverse Normal  |
| Default Rate                       | 10.0% over a WAL of 3.86 years (equivalent to the DP of a Ba3 rating) |
| Default Definition                 | 12 months   |
| COV (Standard Deviation/Mean)      | 43.20%  |
| Portfolio Credit enhancement (PCE) | 20.00%  |
| Timing of Default                  | Flat over portfolio WAL (rounded to 4.0 years)                        |
| Recovery mean                      | 42.00%  |
| Recovery Cov                       | 20.00%  |
| Recovery Lag                       | 50% in second year after default and 50% in third year                |
| Correlation Defaults/Recoveries    | 10.0%   |
| Conditional Prepayment Rate (CPR)  | 5.0%  |
| Amortisation Profile               | Vector provided by the Originator                                     |
| Portfolio yield vector             | Calculated from the loan-by-loan information                          |
| Fees (as modeled)                  | 0.50%   |
| Euribor/Swap Rate                  | 4.0%  |
| PDL Definition                     | On default  |

Source: Moodys Investors Service

**TRANCHING OF THE NOTES**

To derive the level of losses on the notes, we applied the default distribution and the stochastic recovery distribution explained in Section Primary Asset Analysis to numerous default scenarios on the asset side. The exhibit below shows the default distribution we used to model the transaction's cash flows.

Exhibit 25

**Loss Probability Distribution**

Source: Moody's Investors Service

We have considered how the cash flows generated by the collateral are allocated to the parties within the transaction, and the extent to which various structural features of the transaction might themselves provide additional protection to investors, or act as a source of risk.

To determine the rating assigned to the notes, we used an expected loss methodology that reflects the probability of default for each series of notes times the severity of the loss expected for the notes. To allocate losses to the notes in accordance with their priority of payment and relative size, we used a cash-flow model (ABSROM) that reproduces many deal-specific characteristics such as the main input parameters of the model described above. Weighting each default scenario's severity result on the notes with its probability of occurrence, we calculated the expected loss level for each series of notes as well as the expected average life. We then compared the quantitative values to the Moody's Idealised Expected Loss table to determine the ratings assigned to each series of notes.

The "Tranche A Loss" line in the exhibit above represents the loss suffered by the Class A notes (in our modeling) for each default scenario on the default distribution curve. For default scenarios up to 18.9%, the line is flat at zero, hence the Class A notes are not suffering any loss. The steepness of the curve then indicates the speed of the increase of losses suffered by the Class A noteholders.

**Additional Structural Analysis****MARGIN COMPRESSION DUE TO PREPAYMENTS**

By assuming 50% margin compression (i.e. 50% of CPR applied to highest interest rate paying loans), we stressed the yield vector derived from the loan-by-loan information haircutting 0.34% from the fixed-rate vector and 0.26% from the floating-rate margin vector.

**INTEREST RATE MISMATCH**

34.4% of the pool balance corresponds to fixed-rate assets and 65.6% to floating-rate loans (mainly linked to three-month, six-month and twelve-month EURIBOR), whereas the notes will be floating liabilities (three-month EURIBOR).

As a result, the issuer is subject to (1) base rate mismatches on the floating portion of the portfolio (i.e. the risk that (i) the reference rate used to compute the interest amount payable on the notes will differ from the reference rate used on the underlying receivables; and (ii) the interest rate payable on the notes is determined on a different date than the rate to be paid on the underlying receivables); and (2) fixed/floating mismatch (i.e. the risk that the interest rate on the notes will differ from the interest rate payable on the fixed portion of the portfolio), given that the transaction is not hedged.

*Floating portion of the portfolio:* Our analysis takes into account the potential interest rate exposure and is based on the observed historical volatility between the interest rate payable on the notes and the respective interest rates payable by the assets. The resulting adjustment to the gross margin on the loans would currently be in the range of 50bps.

*Fixed portion of the portfolio:* The fixed-floating risk is quantified by making stressed assumptions on the evolution of the three-month EURIBOR over the life of the fixed-rate sub-pool.

#### **COMMINGLING RISK**

All borrowers pay by direct debit mechanism into the dedicated collection account in the name of the servicer at the beginning of a month. Funds are then swept daily into the issuer's collection account (for more details on commingling risk, see section Detailed Description of the Structure).

## Methodology and Monitoring

### Methodology

- » [Moody's Global Approach to Rating SME Balance Sheet Securitizations, August 2017](#)

To access the reports, click on the entries above. Note that these references are current as of the date of publication of this report and that more recent reports may be available. All research may not be available to all clients.

### Monitoring

We will monitor the transaction on an ongoing basis to ensure that it continues to perform in the manner expected, including checking all supporting ratings and reviewing periodic servicing reports. Any subsequent changes in the rating will be publicly announced and disseminated through Moody's Client Service Desk.

The following factors may have a significant impact on the subject transaction's rating: the performance of the underlying assets, the counterparty risk and Spain's country risk.

#### **Monitoring report:**

##### **Data Quality:**

- » The Investor report includes all necessary information for Moody's to monitor the transaction
- » Undertaking to provide Moody's with updated pool cut on a periodical basis

##### **Data Availability:**

- » The frequency of the publication of the investor report is quarterly
- » Investor reports publicly available on the Management Company website
- » The Management Company will provide Moody's with periodic information on the status of the SPV and the performance of the loans

## Appendix 2: Originator and Servicer Detail

Exhibit 26

### Originator and Servicer Detail

| <b>Originator Ability:</b>                    |  |
|---|--|
| Originator Overview                           | CaixaBank is Spain's third-largest banking group by total assets. Although it has a nationwide franchise, the group is particularly strong in Catalonia and Navarra, where it holds leading market shares. Catalonia is one of Spain's wealthiest regions and has a diversified economy. Nationwide, CaixaBank held around 15% of deposits and 16% of loans as of year-end 2017, and had the largest branch network, with an around 18% market share. CaixaBank's 13.8 million customers as of year-end 2017 (15.7 million including Banco BPI) are serviced by a one-stop distribution model for finance and insurance needs.   |
| Sales and Marketing Practices:                | <ul style="list-style-type: none"> <li>» Number of employees: Group: 37,511; excluding BPI: 32,613 (as of September 2018)</li> <li>» Number of branches in Spain: 4,681 branches (as of September 2018)</li> </ul>   |
| Underwriting Policies and Procedures:         | <ul style="list-style-type: none"> <li>» CaixaBank's analytical approach is primarily based on the borrower's repayment capacity rather than the nature of the securities pledged</li> <li>» Internal rating and credit scoring: The several internal rating and credit scoring systems in place play a key role in CaixaBank's underwriting process. The entity has several different models, among these: three for SMEs depending on the obligor's size, one for real estate developers and one for large corporates. The scoring system for self-employed individuals is a very efficient tool, with scores updated monthly. The same efficiency is detected in the internal rating system for corporates, where the internal ratings are updated annually (when the financial statements are published) but also operational alerts are periodically shown. For SMEs, ratings are updated on a monthly basis. Both systems have already been certified by the Bank of Spain (so the size of regulatory capital needed is estimated with them)</li> <li>» Approval mechanisms to cover specific segments, distinguishing between retail banking, Business Centres, Real Estate Business Centres, Institutional Banking Centres, International Offices and Corporate Banking Centre</li> <li>» System of authorisation limits based on expected loss or nominal amount.</li> <li>» Electronic file as a procedure for managing applications</li> <li>» Individual customer segment: risk-adjusted price control systems for mortgage applications through differentiated authorisation limits</li> <li>» Business segment: Risk metrics in the approval process: (a) Ratings: essential element in the analysis. Controls are set up to ensure that the ratings are used in analysing the risk of each loan. If the rating has not been updated the system rejects the operation; (b) System of risk adjusted prices. This complements the assessment of risk adjusted return at customer level, calculated monthly as benchmark spread (risk cost) versus margin on risk (customer level margin)</li> <li>» Employees have authority to grant small loans to borrowers with high exposure, therefore streamlining processes</li> </ul> <p>CaixaBank has an authorization system for approving risks based on the level assigned to the various approving bodies. Loan approval is generally performed at the branch level.</p> |
| Collateral Valuation Policies and Procedures: | <ul style="list-style-type: none"> <li>» Valuation process: In line with standard practise in the market (valuators certified by the Bank of Spain)</li> </ul>   |
| Closing Policies and Procedures:              | <ul style="list-style-type: none"> <li>» In line with the market standards</li> </ul>  |
| Credit Risk Management:                       | <ul style="list-style-type: none"> <li>» The Board of Directors determines the group's risk policies and delegates the creation of risk management committees</li> <li>» Global Risk Committee: In charge of a comprehensive management of the Group's risks, among them credit risk. It establishes a series of triggers whose breach prompts, depending on the type of risk, different alerts, communications, and courses of action at different levels of the organisation</li> <li>» Credit Committee: Analyses and, if appropriate, approves operations within its level of responsibility, referring those outside the bounds of its authority to the Board of Directors.</li> <li>» Risk measurement models: Tools and techniques based on specific needs of each type of risk, including ratings, scorings, probability of default (PD), loss given default (LGD) and exposure at default (EAD). The models are integrated into management and monitoring</li> <li>» Banking Business Management Model implemented throughout the organisation down to the branch level</li> <li>» The branches have innovative tools on hand to assist them with global management of all the business they generate</li> <li>» The internal models for measuring credit risk have received approval from the Bank of Spain</li> </ul>   |
| <b>Originator Stability:</b>                  |  |
| Originator rating:                            | Caixabank (Long Term Deposit Rating: Baa1 Not on Watch /Short Term Deposit Rating: P-2 Not on Watch; Long Term Counterparty Risk Assessment: A3(cr) Not on Watch /Short Term Counterparty Risk Assessment: P-2(cr) Not on Watch; Outlook: Stable)  |
| Regulated by:                                 | » BCE / Bank of Spain  |
| Management Strength and Staff Quality         | <ul style="list-style-type: none"> <li>» Staff have access to policies via the intranet</li> <li>» Employees are trained on a continuous basis to meet area and market needs</li> </ul>  |
| Quality Controls and Audits:                  | <ul style="list-style-type: none"> <li>» Internal Audit Division: continuously monitors internal control systems and checks the accuracy of the risk measurement and control methods employed by the various divisions involved in risk monitoring</li> <li>» CaixaBank carries out annual external audits</li> </ul>  |
| <b>Arrears Management:</b>                    |  |
| Staff Description:                            | » CaixaBank has a staff of around 340 supervising the recovery process, which is carried out at different levels of the organisation, starting at the branch level. The document preparation tasks (before the judicial process) are outsourced to GDS-CUSA, a company fully owned by CaixaBank  |
| Early Stage Arrears Practices:                | <ul style="list-style-type: none"> <li>» CaixaBank checks daily the debtors' accounts in case of unpaid positions in order to collect any amount in such accounts</li> <li>» Early stage arrears includes communication with the borrower through different channels (telephone calls, letters)</li> <li>» Pre-litigation process (where legal file for litigation is prepared) can generally begin after 45 days in arrears. For loans backed by a mortgage pre-litigation starts at day 61. For unsecured loans legal proceedings starts at around day 110. In cases where legal procedures have weaker chances (overdrafts, credit cards) the "friendly" recovery phase is exhausted, and legal proceedings starts at around 270-365</li> </ul>   |
| Late Stage Arrears Practices:                 | <ul style="list-style-type: none"> <li>» CaixaBank works with a group of external lawyers for litigation matters</li> <li>» CaixaBank can repossess properties in case of void auctions</li> <li>» Even after default (formal write-off) of the loan, branches remain responsible of further recovery actions, with the help of external specialised companies</li> </ul>  |
| Loan Modifications:                           | » Not made available   |

Source: Moody's Investors Service, based on the data received from the Originator

## Appendix 3: Eligibility Criteria and Waterfall

### Eligibility Criteria

The key eligibility criteria are as follows:

- » All the loans/lines of credit have been either formalised under public deed or through a private contract
- » The loans/lines of credit have been granted to SMEs and self-employed individuals located in Spain
- » The pool does not include lease contracts or syndicated loans
- » Euro-denominated contracts pay by direct debit
- » All contracts have been originated by CaixaBank following its underwriting standards
- » 5% of the definitive portfolio may be composed of contracts that are delinquent no more than 30 days. 1% of the definitive portfolio may be composed of contracts that are delinquent between 31 and 90 days
- » All contracts are regulated by Spanish law
- » The principal of all securitised loans and draws/redraws under lines of credits has been 100% disbursed (notwithstanding there can be other separate drawdowns not included in the portfolio)
- » There are no refinanced/restructured contracts (as currently defined by the Bank of Spain)

### Waterfall

Allocation of payments/pre accelerated waterfall: On each payment date, the Issuer's available funds will be applied in the following simplified order of priority:

1. Senior fees and expenses
2. Interest on Class A notes
3. Principal on Class A notes
4. Fill-up of the cash reserve account up to the required level (for as long as Class A bonds are still outstanding)
5. Interest on Class B notes
6. Principal on Class B notes
7. Fill-up of the cash reserve account up to the required level (once Class A bonds have fully amortised)
8. Junior fees and expenses
- 9.

Allocation of payments/post accelerated waterfall:

1. Senior fees and expenses
2. Interest on Class A notes
3. Principal on Class A notes
4. Interest on Class B notes
5. Principal on Class B notes
6. Junior fees and expenses

## Appendix 4: Management Company main responsibilities

The main responsibilities of the Management Company are the following:

- » Handling the accounting of the SPV with due separation from that of the Management Company
- » Complying with its formal, documentary and reporting duties to the Spanish Securities Market Commission (Comisión Nacional del Mercado de Valores or CNMV), the rating agencies and any other supervisory bodies
- » Appointing and, if necessary, replacing and dismissing the auditor responsible for reviewing and audit the SPV's annual accounts
- » Validating and controlling the information it receives from the Servicer regarding the loans
- » Complying with the calculation duties provided for and taking the actions laid down in the Deed of Constitution and in the Prospectus
- » Checking that the amounts actually paid to the SPV match the amounts that must be received by the SPV
- » Calculating and determining on each determination date the principal to be amortised and repaid on each bond series on the relevant payment date
- » Verifying that the amounts credited to the treasury account return the yield set in the agreement
- » Instructing the transfer of funds between the various borrowing and lending accounts, and issuing all relevant payment instructions, including those allocated to servicing the bonds
- » Calculating the available funds, the available funds for the notes amortisation, the liquidation available funds and the payment or withholding obligations to be complied with, and applying the same in the priority of payments or, as the case may be, in the liquidation priority of payments
- » The management company may extend or amend the agreements entered into on behalf of the SPV, and substitute, as necessary, each of the SPV's service providers on the terms provided for in each agreement

CREDIT RATINGS AND MOODY'S PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. NEITHER CREDIT RATINGS NOR MOODY'S PUBLICATIONS COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS AND PUBLISHES MOODY'S PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS OR MOODY'S PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER. ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing the Moody's publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from \$1,500 to approximately \$2,500,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody's.com](http://www.moody's.com) under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJJK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJJK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJJK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJJK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJJK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJJK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJJK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
